Universal Design

Universal Design is specifically for the Aging-In-Place customer. This element design is built-in across the entire home and allows people to remain in their homes as they become less mobile.

Curbless Showers and Bench Seating

The curbless shower provides easy access and adding bench seating is also a standard feature. A ShowerLite or a Shower ClearMirror fog-free mirror positioned near the bench at face level and another one at standing height is an ideal accessory for residential "Aging-In-Place" clients.

Shower ClearMirror and ShowerLite

The fog-free operation allows the gentleman to shave in the shower. Ladies will use the Shower ClearMirror to remove make-up and to apply facial treatments. The **Original ClearMirror** heater mounts behind any vanity mirror and keeps that area fog free. This is a solution for wheel-chair confined home owners who would not be able to reach the mirror to wipe off the condensation.
